

Straitline[®] Canvas

Thermal Barriers

We've got you covered.

Thermal Barriers

Innovative **Straitline® Thermal Barriers** (also known as chiller blinds or chiller bungs) are designed to create the perfect division between frozen and chilled products. We combine 70mm of closed cell foam insulation with a full outer skin, protecting the foam from damage. The foam core provides flexibility and strength, while offering superior insulating properties.

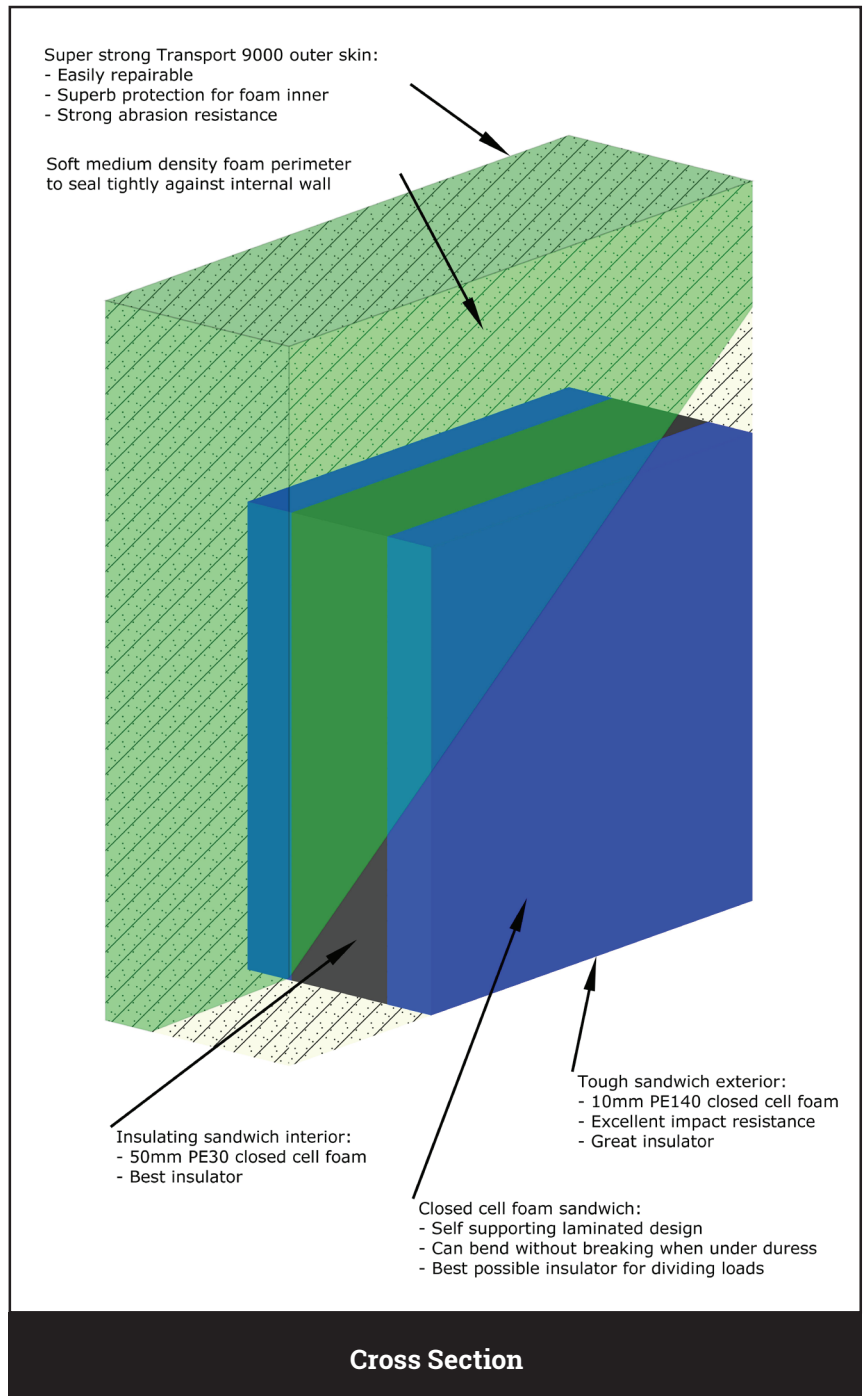

Light Green is standard, but we have multiple colour options available.

Visit our website to see the full colour range: <https://straitline.co.nz/fabrics/transport-9000-pvc>

Please see the back cover for a measure sheet. You can also see more information on our website: <https://straitline.co.nz/thermalbarriers>

Thermal Barriers

TOUGH 900GSM PVC SKIN

Full outer skin prevents side foams from breaking off. European made PVC.

PROTECTIVE PLASTIC SKID BASE

HDPE plastic skid base for easy handling and to protect against forklift strikes.

STRONG WEBBING HANDLES

Easy on your hands. Sewn to welded reinforcements for lasting strength.

EASY REORDER LABEL

Simply call us with the job number to order replacement thermal barriers.

STENCILLING AVAILABLE

Option of stencilling with your business name or registration.

VELCRO JOIN OPTION

Option of a velcro joiner panel for maximum seal and easy movement between temperature zones.

SOFT FOAM EDGING

Soft foam on sides and top for optimum seal.

70MM CLOSED CELL FOAM CORE

Tough closed cell foam core for the ultimate insulation, while balancing weight and strength.
