THERMAL BARRIERS

Innovative Straitline® Thermal Barriers (also known as chiller blinds or chiller bungs) are designed to create the perfect division between frozen and chilled products.

70mm of closed cell foam insulation, offering industry-leading insulation. Covered by a tough PVC outer skin, ensuring the foam is protected from damage. Soft foam edges allow Straitline® Thermal Barriers to conform to the truck body, ensuring a fantastic seal.

Tough PVC Skin

Full outer skin prevents side foams from breaking off and protects foam insert.

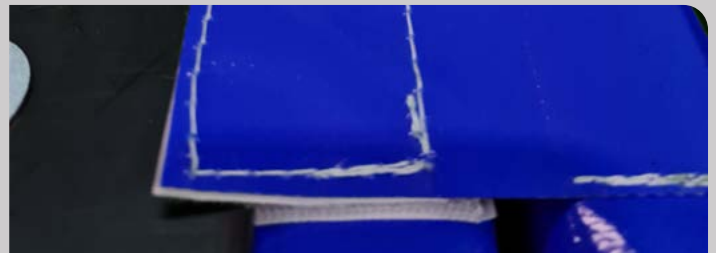

HDPE Plastic Skid Base

HDPE plastic skid base for easy handling and to protect against forklift strikes.

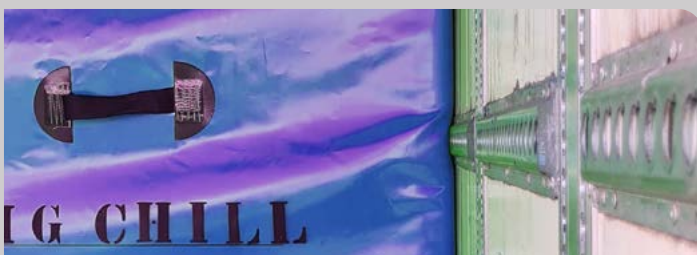

Webbing Handles, Sewn & Welded

Easy on your hands. Sewn to welded reinforcements for lasting strength.

Velcro Join

Velcro joiner panel for maximum seal and easy movement between temperature zones.

Soft Foam Edging

Soft foam on sides and top for optimum seal.

Optional Printed Logo

Fully printed logo available for an extra \$63 +GST per set.
